

# BUILDING COMMUNITY FED GREEN ENERGY COMPANIES.

The world is changing and we want YOU to be part of that change. UBER enables anyone to be a taxi driver. Airbnb enables anyone to be a hotel. Rowan Energy's platform utilising the power of blockchain enables anyone to be a green energy company. The future of the grid is there will be no grid.

## PROBLEM

## SOLUTION

The current system for rewarding households for their roof top generated electricity is unprofitable and prehistoric in its design

Rowan Energy's platform allows users sell their energy directly to other consumers by tokenising the trade of that energy. The payments bypass the large profit driven energy suppliers. This means more of the payment comes back to the household that generated the energy. Customers that use our energy platform will be able to see in real time where their energy is coming from

## PROBLEM

## SOLUTION

Currently there is no way to track the energy generated by roof top solar back to its generation source.

By using our custom built, powerful yet low powered immutable blockchain, we can along with newly released smart meters log on a decentralised ledger when, where, how and how much energy was generated. By tokenizing energy production we open up the residential generator to the renewable energy certificate market. This means they would no longer need to buy certificates from other large generators adding almost 50% returns for the energy they sell.

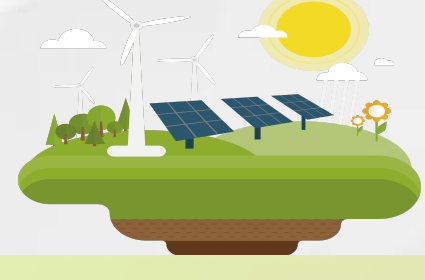

## PROBLEM

## SOLUTION

Using Blockchain to encourage green energy is not viable due to the incredible amount of energy it takes to mine transactions.

Our blockchain is a POA (proof of authority) blockchain that is designed to run on ultra lower powered devices. The devices are in the home of our supporters and take only about \$10 per year to power.

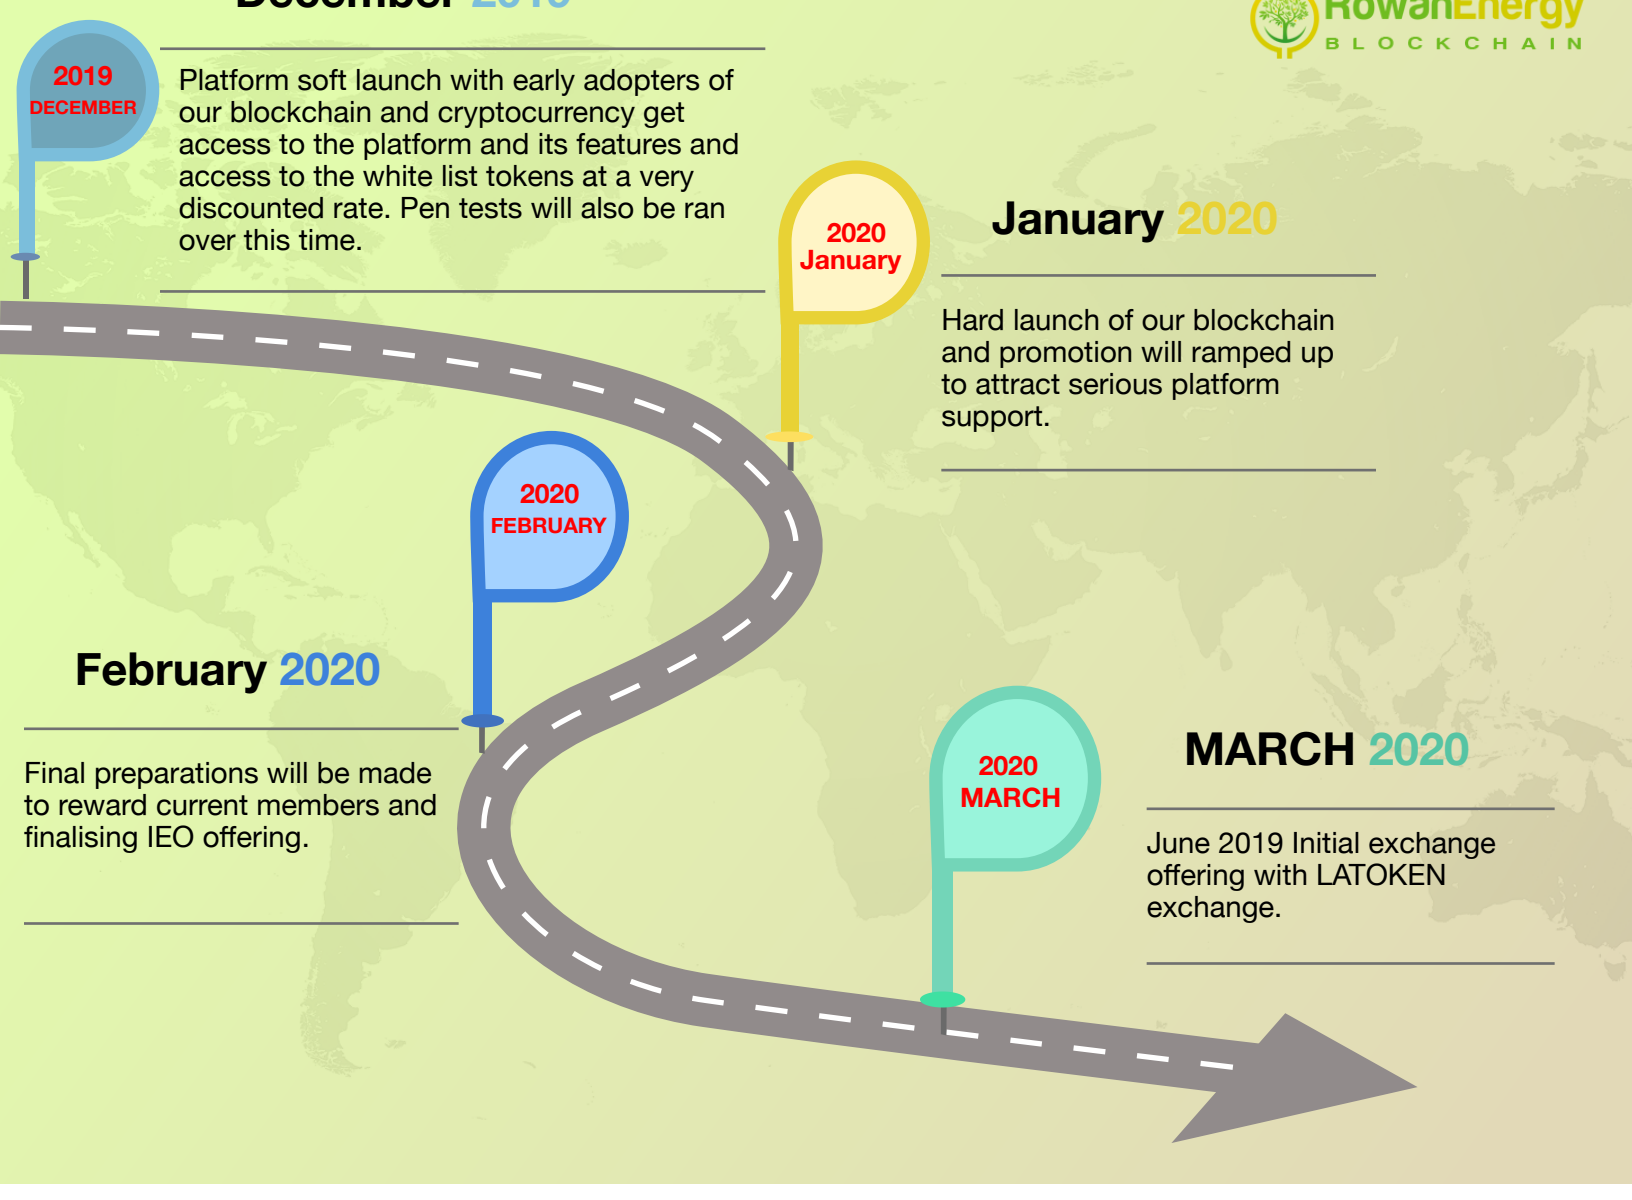

### December 2019

**2019 DECEMBER**  
Platform soft launch with early adopters of our blockchain and cryptocurrency get access to the platform and its features and access to the white list tokens at a very discounted rate. Pen tests will also be ran over this time.

**2020 January**  
**January 2020**  
Hard launch of our blockchain and promotion will ramped up to attract serious platform support.

**February 2020**  
Final preparations will be made to reward current members and finalising IEO offering.

**2020 MARCH**  
**MARCH 2020**  
June 2019 Initial exchange offering with LATOKEN exchange.

**David Duckworth**  
**CEO & Founder**
